

Invitation

Presentations by Students: Demola Hub (Finland) Training

Innovation is in our
Dynamism
Novelty
Agility

The first group of NUST students recently participated in an eight-week online course facilitated by Demola Hub, a co-creation company based in Finland.

Demola Hub offers training in projects that are strategically designed to give participants the opportunity to gain crucial skills that are relevant in the corporate world.

The projects are centred on interdisciplinary communication and project management, amongst others.

Taking part in the projects further gives students the opportunity to work with international teams and become familiar with strategic foresight tools and design thinking methodologies.

*Topics to be presented include:
Smart City Revolution; Future
of Neighbourhoods and Local
Communities; and The Next
Generation's Energy Dilemma.*

Monday, 15 May 2023

08h00 - 11h00
[three sessions]
